To the Office of the Secretary of Defense

Gentlemen,

The enclosed is a part of a letter written to me by my Brother in law a

Mr.

St. Michael
Barbados
B.W.I.

I thought perhaps you would be interested in this item.

Respectfully Yours,

The End of Sputnik the 2nd.

April 13th 1958

At about five to ten on Sunday night, as I was closing the front door, I noticed a peculiar glistening "blue" in the sky to the North, and on moving out into the verandah I saw an object a little smaller than the moon dead North and traveling South slightly East. This object appeared as an aluminum ball, and was followed by around twenty smaller objects, which were like balls with cones attached, and these were entirely red. The leading object when due East of Sunway did not appear to be farther away than about two to three miles, and about 1000 to 1500 feet high, or not quite as high as the planes come in and around the course sometimes used by them. From the first object to the last was, meaning across the sky, about sixty to seventy feet, and the leader was then seen to be winking. There was no set order or positioning of the smaller objects, but they were definitely "glowing" red, and the entire space surrounded with the "blue light." The time elapse from when I saw it to the last glimpse was not more than one and one half or maybe two minutes. In other words its forward speed was much faster than a plane, but it could be noticed to be slowly moving downward. It was a very pretty sight but very alarming and frightening. Here is my mind's picture:

As you will note the tail of the first object bloomed out, whereas the tails of the smaller which were attached to each bloomed in red dashes were also without heads.

- ① Second-hand info (Rearney)
- ② Account of what time
- ③ Blue winking (or blinking) light
- ④ objects red
- ⑤ 1st - blue light
- ⑥ Duration, fall in path, suggested a/c on flight
